SUMMARY

Computer Science undergraduate specializing in HCI and Game Technology. Skilled in building performant systems, cross-platform applications, and gameplay mechanics. Strong foundation in data structures, algorithms, and software development; eager to apply technical and creative abilities to challenging projects.

EDUCATION

Indian Institute of Information Technology, Nagpur

Nagpur, India

B.Tech — Computer Science and Engineering (HCI & Gaming Technology); GPA: 7.96

July 2023 - June 2027

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Human Computer Interaction, Software Engineering

PROJECTS

GamesLog: Social Gaming Tracker | *Node.js, PostgreSQL, Prisma*

Dec 2025 – Present

- Designed a relational backend for user libraries, play sessions, reviews, and social feeds with normalized PostgreSQL tables and optimized queries
- Implemented JWT-based authentication, paginated activity feeds, and analytics endpoints for tracking hours played and game statistics
- Built core features including game discovery, user profiles, and comment systems with a clean API architecture

L-Systems & IFS Studio | *Python, Streamlit, NumPy, PIL*

Nov 2025 – present

- Built a procedural art generator combining stochastic L-Systems with IFS-based fractals
- Implemented rule parser, turtle renderer, phyllotaxis engine, and batch SVG/PNG export
- Added presets for plants, geometric curves, and IFS (Barnsley Fern) with real-time preview
- Optimized expansion engine enabling 0.2–1.5s generation for complex fractals

Task Scheduling in Cloud Computing | *Python, SQLite*

Sep 2024 – Oct 2024

- Implemented MAC-HDE algorithm for heterogeneous cloud task scheduling
- Developed modules for task input, adaptive scheduling, and result logging
- Achieved 15–16% reduction in makespan and wait times vs. Traditional algorithm baselines

SKILLS

Languages: Python, Java, JavaScript, C++, C, C#

Web & Backend: Node.js, Express.js, React

Databases: MySQL, MongoDB, SQL, File I/O

Cloud & Tools: Google Cloud (Beginner), Oracle Cloud, Git

Other: Unity, Gameplay Systems, Performance Optimization, Agile, DevOps

Soft Skills: Leadership, Event Management, Writing, Logical Reasoning, Problem-Solving, Analytical Thinking

ACHIEVEMENTS & INTERESTS

- Secured 1st Place / 20+ teams – TECHNEX'25 Game Jam, IIT BHU (2025) – Deception-driven tower defense design
- Achieved 1st Prize / 30+ teams – Tantarfiesta'25 Designathon (UI/UX Hackathon) – Non-linear, emotion-based journaling app design (Figma Prototype)
- Secured 3rd Runner-Up – Exergy Case Study Challenge, IIT Kanpur (2025)
- Interests:** Scalable systems, HCI, Game Design, Performance Optimization

CERTIFICATIONS

- Introduction to Game Design** – Epic Games (ID: EIDMET191FFV)
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate** – View Credential
