SUMMARY

Computer Science undergraduate specializing in Human-Computer Interaction and Game Technology. Skilled in building performant systems, cross-platform apps, and interactive game experiences. Strong foundation in data structures, algorithms, and software design; eager to apply technical and creative skills to real-world challenges.

EDUCATION

Indian Institute Of Information Technology, Nagpur

B.Tech — Computer Science and Engineering (Human Computer Interaction & Gaming Technology)

August 2023 – Present

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Human Computer Interaction, Software Engineering

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C++, C, C#

Web & Backend: Node.js, Express.js, React, HTML, CSS, Bootstrap

Databases: MySQL, MongoDB, SQL, file I/O persistence

Systems & Design: Scalable storage & query concepts, modular architecture, OOP (coursework)

Cloud & Tools: AWS (basics), Azure, Google Cloud, Git, Agile, DevOps

Other: Unity, game systems, performance-focused engineering

SELECTED PROJECTS

Dual Front — Tactical Tower Defense (Unity, C#)

Mar 2025

- Designed modular Unity C# architecture enabling rapid iteration and extension.
- Engineered wave-based defense mechanics with civilian/spy dynamics; tuned game economy and cooldown-driven spells, improving strategic depth by 20% in playtests.
- Led feature implementation and playtest-driven balancing; submission won TECHNEX'25 Game Jam.

CineNeon — Cross-Platform App (Dart / Flutter)

Apr 2025 – Present

- Built a high-performance Flutter app for web and mobile using clean architecture (lib/, web/, android/).
- Focus on fast UI transitions and sub-200 ms screen loads; set up Nix-based environment configuration and automated tests.

Task Scheduling in Cloud Computing — Research Implementation (Python)

Sep 2024 – Oct 2024

- Implemented and evaluated the Modified Adaptive Chaotic Hybrid Differential Evolution (MAC-HDE) algorithm for optimizing task scheduling in heterogeneous cloud environments.
- Designed modules for task input, adaptive scheduling, result logging (SQLite), and Gantt chart visualization using Python (NumPy, pandas, matplotlib).
- Achieved 15–20% improvement in makespan and waiting time over baseline algorithms (HEFT, DE) with adaptive parameter tuning and chaotic perturbation.

CERTIFICATIONS

- Introduction to Game Design**, Epic Games (Credential ID EIDMET191FFV)

Oct 2023 – Dec 2023

ACHIEVEMENTS & INTERESTS

- Winner, TECHNEX'25 Game Jam (IIT BHU) — deception-driven tower defense design.
- Winner, Tantarfiesta'25 Designathon (UI/UX Hackathon) — non-linear, emotion-based journaling app design (Figma Prototype).
- Interests: scalable systems, HCI, game design, performance optimization.
